

Carpintería Ramón García, S.A., a company dedicated to the design, manufacture, and installation of joinery work, aware of its social responsibility, aims to convey to its customers, collaborators, and employees the actions it promotes to ensure the incorporation of environmental criteria in all processes of the product life cycle and to incorporate Ecodesign, in order to guarantee the minimal environmental impact of its products.

In this regard, the management of Carpintería Ramón García, S.A. establishes this policy, through which it commits to:

- Implement, maintain, and integrate environmental issues related to the product and ecodesign based on the ISO 14.006:2020 standard, integrating it with the UNE-EN ISO 14001, UNE-EN ISO 9001, and UNE-EN ISO 45.001 standards, so that:
  - They encompass all activities, processes, and products of the company.
  - They are assumed by each of the employees according to the roles and responsibilities assigned to them by management.
- Encourage the participation of employees and other stakeholders in identifying environmental aspects derived from the life cycle of our products.
- Comply with current legislation and regulations, as well as any other environmental requirements or demands related to its processes and products.
- Understand, analyze, and meet the needs and expectations of our customers and other stakeholders, in order to incorporate their criteria into our processes.
- Establish specific objectives and goals to achieve a model of continuous improvement in the Ecodesign of our products and our Ecodesign process, in order to progressively reduce their environmental impacts and continuously improve their environmental performance.
- Incorporate environmental criteria into our purchasing processes and supplier evaluations, in order to use raw materials and technologies with lower environmental impact.
- Implement effective communication mechanisms regarding the environmental performance of our products and the processes that generate them, among the different levels of the company and with suppliers or customers, in order to incorporate their needs and expectations into our management.

- Avoid transferring environmental impacts from one stage of the life cycle to another, or from one category to another, except in cases where there is a net reduction in negative environmental impacts.
- Consider the environmental aspects and impacts of its products throughout their entire life cycle, to minimize their effect and continuously improve their environmental performance.

To achieve these Ecodesign objectives, the management of Carpintería Ramón García assumes and promotes:

- The application of measurement methods that allow for the monitoring of the results obtained from its Ecodesign processes and products and comparing them with the planned ones.
- The analysis of the causes of non-conformities and the implementation of necessary corrective actions to prevent their recurrence.
- The conduct of periodic audits to evaluate the status of Ecodesign management and its update in accordance with the reference standards.

Additionally, the management of Carpintería Ramón García commits to:

- Document and safeguard the information related to all actions and activities derived from its Ecodesign management and provide it to auditing companies and competent authorities when required.
- Communicate the Ecodesign Policy to all company employees at the time of their hiring and periodically disseminate it to raise awareness and sensitize employees.
- Make this policy available to stakeholders, review it periodically, and update the action lines when deemed appropriate.

Mesia, 12/01/2021

The Management.
